1 Comprised of all Infrastructure Strategies.

2 The data is based on a representative portfolio for the strategy. Refer to the GIPS Disclosure below for further information. Sectors are internally defined. Geographical exposure is by domicile of listing. Exposures may not sum to 100% due to rounding.

3 Returns are for the Global Core Infrastructure Composite and denoted in USD. Performance would vary if returns were denominated in a currency other than USD. Refer to the GIPS Disclosure section below for further information. Composite (Net) returns are net of fees charged to clients and have been reduced by the amount of the highest fee charged to any client employing that strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request.

4 Risk measures are for the Global Core Infrastructure Composite before fees. The Global Equity Index is the MSCI World NTR Index.

5 The Benchmark or Global Infrastructure benchmark is comprised of the following: from inception to 31 December 2014 the benchmark is UBS Developed Infrastructure & Utilities NTR Index and from 1 January 2015 onwards, the benchmark is the S&P Global Infrastructure NTR Index. Note: the UBS Developed Infrastructure and Utilities NTR Index ceased to be published from 31 May 2015, replaced on 1 January 2015 with the S&P Global Infrastructure NTR Index.

\* Returns are only for part year.

#### IMPORTANT NOTICE

This material is being furnished to you to provide summary information regarding Magellan Asset Management Limited trading as MFG Asset Management ('MFG Asset Management') and an investment fund or investment strategy managed by MFG Asset Management ('Strategy'). This material is not intended to constitute advertising or advice of any kind and you should not construe the contents of this material as legal, tax, investment or other advice. In making an investment decision, you must rely on your own examination of any offering documents relating to the Strategy.

The investment program of the Strategy presented herein is speculative and may involve a high degree of risk. The Strategy is not intended as a complete investment program and is suitable only for sophisticated investors who can bear the risk of loss. The Strategy may lack diversification, which can increase the risk of loss to investors. The Strategy's performance may be volatile. Past performance is not necessarily indicative of future results and no person guarantees the future performance of the Strategy, the amount or timing of any return from it, that asset allocations will be met, that it will be able to implement its investment strategy or that its investment objectives will be achieved. Statements contained in this material that are not historical facts are based on current expectations, estimates, projections, opinions and beliefs of MFG Asset Management. Such statements involve known and unknown risks, uncertainties and other factors, and undue reliance should not be placed thereon. This material may contain 'forward-looking statements'. Actual events or results or the actual performance of an MFG Asset Management financial product or service may differ materially from those reflected or contemplated in such forward-looking statements. The Strategy will have limited liquidity, no secondary market for interests in the Strategy is expected to develop and there are restrictions on an investor's ability to withdraw and transfer interests in the Strategy. The management fees, incentive fees and allocation and other expenses of the Strategy will reduce trading profits, if any, or increase losses.

No representation or warranty is made with respect to the correctness, accuracy, reasonableness or completeness of any of the information contained in this material. This information is subject to change at any time and no person has any responsibility to update any of the information provided in this material. This material may include data, research and other information from third party sources. MFG Asset Management makes no guarantee that such information is accurate, complete or timely and does not provide any warranties regarding results obtained from its use. MFG Asset Management will not be responsible or liable for any losses, whether direct, indirect or consequential, including loss of profits, damages, costs, claims or expenses, relating to or arising from your use or reliance upon any part of the information contained in this material including trading losses, loss of opportunity or incidental or punitive damages.

No distribution of this material will be made in any jurisdiction where such distribution is not authorised or is unlawful. This material does not constitute, and may not be used for the purpose of, an offer or solicitation in any jurisdiction or in any circumstances in which such offer or solicitation is unlawful or not authorized or in which the person making such offer or solicitation is not qualified to do so. United Kingdom - This material does not constitute an offer or inducement to engage in an investment activity under the provisions of the Financial Services and Markets Act 2000 (FSMA). This material does not form part of any offer or invitation to purchase, sell or subscribe for, or any solicitation of any such offer to purchase, sell or subscribe for, any shares, units or other type of investment product or service. This material or any part of it, or the fact of its distribution, is for background purposes only. This material has not been approved by a person authorised under the FSMA and its distribution in the United Kingdom and is only being made to persons in circumstances that will not constitute a financial promotion for the purposes of section 21 of the FSMA as a result of an exemption contained in the FSMA 2000 (Financial Promotion) Order 2005 as set out below. This material is exempt from the restrictions in the FSMA as it is to be strictly communicated only to 'investment professionals' as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (FPO).

United States of America - This material is not intended as an offer or solicitation for the purchase or sale of any securities, financial instrument or product or to provide financial services. It is not the intention of MFG Asset Management to create legal relations on the basis of information provided herein. Where performance figures are shown net of fees charged to clients, the performance has been reduced by the amount of the highest fee charged to any client employing that particular strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request and also may be found in Part II of MFG Asset Management's Form ADV.

The Global Infrastructure Benchmark is comprised of the following: from inception to 31 December 2014 the benchmark is UBS Developed Infrastructure & Utilities Index Net Total Return and from 1 January 2015 the benchmark is S&P Global Infrastructure Net Total Return Index. The benchmark changed because UBS discontinued their index series.

The UBS Developed Infrastructure & Utilities Index Net Total Return is a market capitalisation weighted index that is designed to measure the equity performance of listed Infrastructure and Utility stocks. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

The S&P Global Infrastructure Net Total Return Index is a market capitalisation weighted index that is designed to track 75 companies from around the world diversified across three infrastructure sectors energy, transportation and utilities. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

#### GLOBAL INVESTMENT PERFORMANCE STANDARDS (GIPS®) DISCLOSURE

Magellan Asset Management Limited, doing business as MFG Asset Management in jurisdictions outside Australia and New Zealand, (MFG Asset Management) claims compliance with the Global Investment Performance Standards (GIPS®).

For the purpose of complying with GIPS, the Firm is defined as all discretionary portfolios managed by MFG Asset Management, excluding brands managed by subsidiaries operating as distinct business entities. MFG Asset Management is a wholly-owned subsidiary of the publicly listed company Magellan Financial Group Limited. MFG Asset Management is based in Sydney, Australia. Total Firm assets is defined as all assets managed by MFG Asset Management, excluding assets managed by subsidiaries operating as distinct business entities.

The Global Core Infrastructure composite is a global strategy investing in strictly defined or "pure" infrastructure companies (typically 80-100). The filtered investment universe is comprised of stocks that 1. generate reliable income streams, 2. benefit from inflation protection and have an appropriate capital structure. The investment objective of the strategy is to minimise the risk of permanent capital loss; and achieve superior risk adjusted investment returns over the medium to long-term. The composite was created in February 2012.

To achieve investment objectives, the composite may also use derivative financial instruments including, but not limited to, options, swaps, futures and forwards. Derivatives are subject to the risk of changes in the market price of the underlying securities instruments, and the risk of the loss due to changes in interest rates. The use of certain derivatives may have a leveraging effect, which may increase the volatility of the composite and may reduce its returns.

A copy of the composite's GIPS compliant presentation and/or the firm's list of composite descriptions are available upon request by emailing [client.reporting@magellangroup.com.au](mailto:client.reporting@magellangroup.com.au)

The representative portfolio is an account in the composite that closely reflects the portfolio management style of the strategy. Performance is not a consideration in the selection of the representative portfolio. The characteristics of the representative portfolio may differ from those of the composite and of the other accounts in the composite. Information regarding the representative portfolio and the other accounts in the composite is available upon request.

USD is the currency used to calculate performance.

## Strategy Commentary

---

The strategy recorded a positive return in the September quarter. Stocks that contributed the most included the investments in Duke Energy and Excel Energy of the US and Hydro One of Canada. Duke Energy rose on talk the electricity and gas utility would be subject to a takeover bid by power producer NextEra Energy of the US. Xcel Energy gained after the monopoly provider of electricity and gas services across eight mid-western US states announced a higher-than-expected jump of 18% in earnings-per-share growth for the second quarter and management reiterated its 2020 and long-term earnings guidance. Hydro One rose after the electricity transmission and distribution company received a favourable court ruling on its appeal of the regulator's treatment of deferred tax assets.

Stocks that detracted included the investments in Vinci of France, FirstEnergy of the US and National Grid of the UK. Vinci dived after the economic blow associated with the pandemic reduced the first-half revenue of the concessions and construction company by 15%. FirstEnergy plunged after the US Attorney's Office of Ohio charged House Speaker Larry Householder and five others with bribery and money-laundering charges tied to a bill that effectively was a US\$1.5 billion bailout of a former subsidiary of FirstEnergy's nuclear plants in the US state. National Grid fell as investors assessed the impact of the latest draft regulatory rulings in the UK.

## Stock Story: Spark Infrastructure

---

About 15 gigawatts or 63% of Australia's coal-fired power generation will reach the end of its technical life and is likely to be retired by 2040, according to Australian Energy Market Operator, the body that oversees the country's energy markets. Replacing this much coal-fired generation will require more than twice the volume of renewable generation capacity, given the vagaries of renewables. The replacement of the existing coal-fired fleet with renewables will require meaningful investment in transmission networks, as the existing network has an estimated connection capacity of only 13 gigawatts when it comes to renewable resources.

Across about A\$13 billion worth of likely renewables projects sits TransGrid, the monopoly operator of the biggest transmission network by volume in Australia's National Electricity Market. TransGrid delivers power to more than 3.6 million homes and businesses within NSW and the Australian Capital Territory. TransGrid is 15% owned by Spark, an ASX-listed investment fund that owns four major energy assets, of which TransGrid has by far the best growth prospects.

SA Power Networks is the only operator of South Australia's distribution network. The utility distributes power to about 887,000 residential and business customers across the state. SA Power is 49% owned by Spark.

CitiPower and Powercor form Victoria Power Networks, which distributes power to about 330,000 customers in Melbourne and another 810,000 clients in the central and western parts of the state. Victoria Power is 49% owned by Spark. Spark's other, lesser, asset is the 2019-purchased and newly built Bomen Solar Farm that will produce enough renewable energy to power 36,000 homes a year.

These four assets that service about five million clients worth about A\$18 billion form the core, or perhaps springboard, of Spark's 'growth plus yield' strategy. To comprehend the basis for this strategy, it can help to understand that the core business model of utilities is that they own a monopoly right to provide their services in a defined territory but the return on their capital spending is limited to ensure that they provide affordable services to customers. The way, therefore, for a utility to increase gross earnings is to spend more on approved capital works while earning a return on its asset base, a term for the amount of capital on which regulators can earn a regulated return.

The yield part of Spark's strategy is that its share of its Victorian and South Australian distribution assets and its stake in TransGrid give Spark an effective regulated asset base of A\$6.6 billion. In (fiscal) 2019, the regulated return comprised 86% of Spark's revenue of A\$1.2 billion, an increase of 3.3% from 2018.

The growth part of Spark's strategy is about investing more to increase the asset base of its three regulated assets and investing in renewable energy, which often falls outside of the regulated sphere. The NSW government, for example, forecasts A\$8 billion worth of investment will be needed over the coming decade to power the state, divided between regulated and unregulated assets. TransGrid, for example, is considering a joint bid to build a 900-kilometre interconnector between Wagga Wagga and Robertson in South Australia that will enable more renewable energy to be injected into the national grid. This is just one of the plans that could see TransGrid's regulated asset base double in the next decade.

Another leg of Spark's strategy is to enhance the assets it owns; that is to say, make them more efficient so it has more capital to grow its business, something it does well. (Spark calls this its 'value enhance, value build and value acquire' strategy.)

Spark's portfolio of regulated and renewable assets and their potential to expand has helped the company be one of the most resilient stocks over 2020. Many people have seen that Spark offers what investors generally seek when they invest in essential services: growth plus income.

To be sure, Spark faces the challenge of all the regulatory and political uncertainty that surrounds Australia's energy market. Regulators are trimming some of its regulated returns. Spark's plan to invest in solar, wind and storage projects in coming years come with the risk that management might make poor investments.

Even allowing for these risks, though, Spark is likely to deliver on its growth plus yield strategy in the coming years as solar panels, wind farms and other renewable sources of energy become a more important source of power for Australia.
