1 Comprised of all Global Strategies.

2 The data is based on a representative portfolio for the strategy. The representative portfolio changed in July 2017 due to the closure of the former representative portfolio. Sectors are internally defined. Geographical exposure is calculated on a look through basis based on underlying revenue exposure of individual companies held within the portfolio. The Index is the MSCI World NTR Index. Refer to the Important Notice below for further information.

3 Returns are for the Global Plus Composite and denoted in USD. Performance would vary if returns were denominated in a currency other than USD. Refer to the GIPS Disclosure section below for further information. Composite (Net) returns are net of fees charged to clients and have been reduced by the amount of the highest fee charged to any client employing that strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request.

4 Risk measures are calculated before fees and in USD. An adverse market is defined as a negative quarter, rolled monthly, for the MSCI World Net TR USD Index, whilst drawdown measures are measured monthly.

5 Supplementary Statistical Measures Beta, Tracking Error and Information Ratio are calculated in USD using the MSCI World NTR Index.

^ Combined risk ratio is a measure of relative beta and relative drawdown to MSCI World NTR USD Index. Please contact MFGAM should you wish for further details on the calculation.

* Returns are only for part year.

IMPORTANT NOTICE

This material is being furnished to you to provide summary information regarding Magellan Asset Management Limited 'doing business as'/trading as' MFG Asset Management ('MFG Asset Management') and an investment fund or investment strategy managed by MFG Asset Management ('Strategy'). No distribution of this material will be made in any jurisdiction where such distribution is not authorised or is unlawful. This material is not intended to constitute advertising or advice of any kind and you should not construe the contents of this material as legal, tax, investment or other advice.

The investment program of the Strategy presented herein is speculative and may involve a high degree of risk. The Strategy is not intended as a complete investment program and is suitable only for sophisticated investors who can bear the risk of loss. The Strategy may lack diversification, which can increase the risk of loss to investors. The Strategy's performance may be volatile. The past performance of the Strategy is not necessarily indicative of future results and no person guarantees the performance of the Strategy or the amount or timing of any return from it. There can be no assurance that the Strategy will achieve any targeted returns, that asset allocations will be met or that the Strategy will be able to implement its investment Strategy or achieve its investment objective. The management fees, incentive fees and allocation and other expenses of the Strategy will reduce trading profits, if any, or increase losses. The Strategy will have limited liquidity, no secondary market for interests in the Strategy is expected to develop and there are restrictions on an investor's ability to withdraw and transfer interests in the Strategy. In making an investment decision, you must rely on your own examination of any offering documents relating to the Strategy.

No representation or warranty, express or implied, is made with respect to the correctness, accuracy, reasonableness or completeness of any of the information contained in this material. This information is subject to change at any time and no person has any responsibility to update any of the information provided in this material. MFG Asset Management will not be responsible or liable for any losses, whether direct, indirect or consequential, including loss of profits, damages, costs, claims or expenses, relating to or arising from your use or reliance upon any part of the information contained in this material including trading losses, loss of opportunity or incidental or punitive damages.

This material is strictly confidential and is being provided to you solely for your information and must not be copied, reproduced, published, distributed, disclosed or passed to any other person at any time without the prior written consent of MFG Asset Management. Nothing contained herein should be construed as granting by implication, or otherwise, any licence or right to use any trademark displayed without the written permission of the owner.

United Kingdom - This material does not constitute an offer or inducement to engage in an investment activity under the provisions of the Financial Services and Markets Act 2000 (FSMA). This material does not form part of any offer or invitation to purchase, sell or subscribe for, or any solicitation of any such offer to purchase, sell or subscribe for, any shares, units or other type of investment product or service. This material or any part of it, or the fact of its distribution, is for background purposes only. This material has not been approved by a person authorised under the FSMA and its distribution in the United Kingdom and is only being made to persons in circumstances that will not constitute a financial promotion for the purposes of section 21 of the FSMA as a result of an exemption contained in the FSMA 2000 (Financial Promotion) Order 2005 as set out below. This material is exempt from the restrictions in the FSMA as it is to be strictly communicated only to 'investment professionals' as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (FPO).

United States of America - This material is not intended as an offer or solicitation for the purchase or sale of any securities, financial instrument or product or to provide financial services. It is not the intention of MFG Asset Management to create legal relations on the basis of information provided herein. Where performance figures are shown net of fees charged to clients, the performance has been reduced by the amount of the highest fee charged to any client employing that particular strategy during the period under consideration. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Fees are available upon request and also may be found in Part II of MFG Asset Management's Form ADV.

The MSCI World Index (Net) is a free-float adjusted market capitalization weighted index that is designed to measure the equity performance of 24 developed markets. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

GLOBAL INVESTMENT PERFORMANCE STANDARDS (GIPS®) DISCLOSURE

Magellan Asset Management Limited, doing business as MFG Asset Management in jurisdictions outside Australia and New Zealand, (MFG Asset Management) claims compliance with the Global Investment Performance Standards (GIPS®)

For the purpose of complying with GIPS, the Firm is defined as all discretionary portfolios managed by MFG Asset Management.

The Global Plus composite is a concentrated global equity strategy investing in high quality companies (typically 20-40 stocks). High quality companies are those companies that have sustainable competitive advantages which translate into returns on capital materially in excess of their cost of capital for a sustained period of time. The investment objectives of the Global Plus strategy are to earn superior risk adjusted returns through the business cycle whilst minimising the risk of a permanent capital loss. The minimum market capitalisation for a stock to be included is US\$25 billion. The composite was created in July 2013.

To achieve investment objectives, the composite may also use derivative financial instruments including, but not limited to, options, swaps, futures and forwards. Derivatives are subject to the risk of changes in the market price of the underlying securities instruments, and the risk of the loss due to changes in interest rates. The use of certain derivatives may have a leveraging effect, which may increase the volatility of the composite and may reduce its returns.

A list of composites and descriptions, as well as policies for valuing investments, calculating performance, and preparing compliant presentations are available upon request by emailing client.reporting@magellangroup.com.au

The representative portfolio is an account in the composite that closely reflects the portfolio management style of the strategy. Performance is not a consideration in the selection of the representative portfolio. The characteristics of the representative portfolio may differ from those of the composite and of the other accounts in the composite. Information regarding the representative portfolio and the other accounts in the composite is available upon request.

The USD is the currency used to calculate performance.

Market Commentary

Global stocks rose over the June quarter, to mark their eighth gain in the past nine quarters, after companies posted higher-than-expected earnings, especially the US internet giants, the US economy headed towards its 10th year of expansion, the Federal Reserve only tightened monetary policy as expected, Italy formed a workable coalition that said it wanted to stay with the euro, and Japan's central bank promised to keep up monetary stimulus. Gains were capped when US President Donald Trump imposed import restrictions that could lead to trade wars with the EU and China.

US stocks rose on buoyant company and economic news. Financial research and data company FactSet said that about 80% of companies announced earnings per share above mean estimates, the highest rate since FactSet began tracking this measure in 2008. In economic news, the Fed, as expected, in June raised the cash rate by 25 basis points to between 1.75% and 2%, the seventh rate increase since the onset of the global financial crisis. The central bank once again signalled four rate increases would be made over 2018, implying another two before the end of the year. A report showed a Fed gauge of inflation, the core personal consumption expenditure price index, rose 2% in the 12 months to May, the first time it has hit the Fed's price target since 2011. Reports pointed to the US economy expanding briskly in the June quarter, by when the economy would have completed nine years without recession. Among highlights, the jobless rate fell to an 18-year low of 3.8% in May, while retail sales grew 0.8% over the same month, their biggest gain in six months.

European stocks gained after a left-right populist coalition took control of Italy in May after elections in March (even if it is Eurosceptic), moderate Socialist Pedro Sanchez was installed as prime minister in Spain after Mariano Rajoy lost a vote of no confidence over a corruption scandal, and inflation reached the European Central Bank target of 2%, which justified the central bank's decision to end its asset buying by year end. Stocks fell steadily from mid-April highs as concerns about a trade war with the US mounted and Angela Merkel's coalition in Germany threatened to break apart over immigration policy.

Japanese stocks rose after the Bank of Japan said it would persist with monetary stimulus, reports on employment and manufacturing showed the economy might rebound from a contraction in the first quarter and the country was judged insulated from any trade wars. Chinese stocks plunged on concerns about the growing clash with the US on trade and on signs the economy is slowing. Emerging markets struggled as tighter US monetary policy boosted the US dollar and Argentina negotiated a IMF rescue.

Hathaway had bought another 75 million Apple shares. Another boost was that The South China Post also reported the Chinese government has no plans to target US firms in China in response to the Trump administrations trade threats.

Strategy Commentary

The strategy recorded a positive return for the quarter. Stocks that performed best included the investments in Facebook, Visa and Apple. Facebook surged on a view that privacy issues surrounding user data wouldn't impede user and advertising growth, which showed gains in the first-quarter earnings report released in late May. Visa gained after higher consumer spending helped the payments company post higher-than-expected revenue growth of 11.5% and 30% earnings growth for the first quarter, which prompted it to boost guidance for

fiscal 2018. Apple rallied following a result that showed an acceleration in services revenue and healthy iPhone revenue growth, an increase that was helped a few days later by news that the Warren Buffett-run Berkshire Hathaway had bought another 75 million Apple shares. Another boost was that The South China Post also reported the Chinese government has no plans to target US firms in China in response to the Trump administrations trade threats.

Stocks that lagged included the investments in Starbucks, eBay and Yum! Brands. Starbucks declined after disappointing sales growth in the US prompted the coffee chain to reduce outlets in its home market, sales growth in China disappointed and Moody's Investors Services downgraded the company's debt rating by one notch to Baa1 due to an increase in borrowing. Online retailer eBay fell after the US Supreme Court overturned a 1992 ruling that enabled internet retailers to avoid state sales taxes. Yum! Brands slid after the owner of KFC and Pizza Hut reported first-quarter comparable sales that missed estimates due to discounting across the fast-food industry.

Key Stock in Focus – Lowes

Lowes - A new shareholder is driving a challenge to The Home Depot's No. 1 ranking in the US home-improvement market.

In 1946, Carl Buchan was the part owner of a hardware store in North Carolina. Anticipating a post-World War II housing boom, Buchan envisaged creating a hardware chain, so he bought out his brother-in-law. More than 70 years later, his efforts have culminated in Lowe's, the US's second-largest chain of home-improvement and hardware stores.

Buchan and his successors have done much right in the past seven decades to create a retailer with 2,154 stores across North America that in fiscal 2017 recorded a net profit of US\$3.7 billion from US\$68.6 billion in sales.

Recent times have been buoyant for Lowe's and other housing-related businesses. The nine-year expansion of the US economy and the interrelated recovery in housing have buoyed a retail segment that has proved relatively insulated from internet disruption.

Convenience is a big reason why the industry is internet-proof. A large number of stores in close proximity to much of the population service people when they need advice on technical products. The shopping mission often includes bulky goods or urgent purchases that are best done in person. Costly consumables and DIY projects require product selection and planning, both easier done in store. On top of that, demand has been strong for home-related professionals who prefer to buy in store rather than on the internet.

The favourable environment has helped Lowe's boost revenue by 20% over the past three years though this performance of late has been more sluggish, particularly in the first quarter of 2018. The company's share price climbed 37% over the past calendar three years.

Lowe's, however, has an overarching problem in terms of its operational performance. The company isn't judged as well run as the No. 1 home-improvement company. The Home Depot,

based in Atlanta, which recorded a net profit of US\$8.8 billion on sales of US\$100.9 billion in fiscal 2017, is better at

retail basics. Home Depot attracts more people to its stores. The company converts more of those who enter into customers. It entices those supporters to spend more as a proportion of their household budgets. It turns a greater portion of revenue into profits. Home Depot has boosted its same-store revenue for nine consecutive years and the share price has climbed more than Lowe's in recent years; it rose 83% over the past three calendar years – more than double the gain in Lowe's. Lowe's challenge has long been how to stop being overshadowed by Home Depot.

Enter DE Shaw, a New York-based hedge fund. In January this year, Shaw announced it had spent US\$1 billion to buy about 1% of Lowe's and it would use this shareholding to shake up the company. Shaw quickly engineered the appointment of three new directors to the board of Lowe's. One of the new directors is David Batchelder, co-founder of Relational Investors, who when on the board of Home Depot, a decade ago helped turn around that company. In April, Shaw aided the search to replace departing Lowe's CEO Robert Niblock, who had spent 13 years in the role. And in May a new CEO, Marvin Ellison, who led retailer JC Penny from 2015 and who worked in senior roles at Home Depot for 12 years, was appointed. Investors can expect to be well rewarded if the new management can make Lowe's as honed as Home Depot. Management is confident that better execution of retail basics means Lowe's can.

To others, Home Depot has some advantages over Lowe's that will hobble Lowe's efforts to match its bigger rival. One hurdle is that Home Depot had a 15-year head start in placing large 'box' stores in the best locations in the best cities – and in the homeware and hardware segments, location amounts to a local monopoly. Other challenges for Lowe's include that housing-dependent businesses are hostage to macroeconomics. Any slowing in the economy and housing and all housing-related industries tend to struggle. The internet will always remain a potential threat.

But Lowe's under fresh guidance could surmount these challenges or be better placed to cope during any economic and housing downturn. Company insiders estimate that better online offerings, a more appropriate product offering, an enhanced customer experience, and superior servicing of builders and other professionals could reap an extra US\$8 billion in revenue each year for Lowe's while costs could be reduced by some US\$1 billion, especially by making its supply chain more efficient. Confidence that Lowe's can revamp itself is growing, even though the loss of customer traffic and other structural problems won't be easy to overcome. Evidence? 'Activist' investment firm, William Ackman's Pershing Square Capital Management, in May revealed it had bought US\$1 billion worth of Lowe's shares.

Beyond the US

Lowe's became the US's – and the world's – second-largest home-related retailer by offering low prices and one-stop shopping. The company's margin is based on 'everyday low costs' in its supply chain, allowing it to offer profitable 'everyday low prices' to people who buy its products and services for home improvement, home décor, home maintenance, home repair, and remodelling and maintenance of commercial buildings.

Lowe's large-format stores host about 40,000 items over 214 million square feet (19.9 million square metres) of floor space that cater to the 'do it yourself' and 'do it for me' customers. The latter are professionals who cater for older and time-poor

households whom Lowe's target via the Lowe'sForPros.com website.

While it will always face competition from Home Depot, Lowe's is protected against other formidable competitors because it operates in a structured and stable duopoly market. Home Depot and Lowe's control about 24% of the market. The cheaper sources of supplies based on such buying power mean they can undercut smaller competitors. The pair's size alone gives them much bargaining power with suppliers.

Lowe's, which was listed in 1961, has a presence in Canada (since 2007) and Mexico (since 2010). For now, though, it's whether or not the company can meet basic goals such as getting more people into its US stores that will determine how fast goes the expansion that Buchan initiated seven decades ago.
